

Due to the recent IDFPR e-mail communication sent to all Illinois Controlled Substance License holders regarding the requirement to register for an ILPMP account, ILPMP is currently experiencing a higher-than-normal volume of e-mails. Please be advised that communication will be delayed. Please note: If you already have an existing ILPMP account with Illinois State License number, you do not need to register again. Please review the FAQs for detailed information.

ILPMP/SUPR Breaking Barriers with Opioid Treatment Program Reporting

Substance Abuse and Mental Health Services Administration (SAMHSA) announced in July of 2021 the adoption of the revised Confidentiality of Substance Use Disorder Patient Records regulation, 42 CFR Part 2. The adoption of this revised rule will reduce the barriers to care coordination and improve patient safety. Collaboration between both divisions, IDHS/SUPR (Division of Substance Use Prevention and Recovery) and IDHS/ILPMP (Illinois Prescription Monitoring Program) have made forward movement in improving healthcare outcomes while reducing barriers which, in turn, has increased patient safety in Opioid Treatment Programs. With patient consent, the ease of sharing information among providers will enable better, higher-quality care for those with Opioid Use Disorders.

Many drugs prescribed and dispensed by non-Opioid Treatment Programs (OTPs) could have life-threatening consequences if not properly coordinated with those prescribed and dispensed by OTPs. Therefore, it is necessary for OTPs to report, and to access, prescription drug records in the ILPMP, and to monitor accordingly.

Please join us virtually on August 31 at 10am, National Overdose Awareness Day in Illinois, as we discuss how impactful this law is for people with Opioid Use Disorders, ultimately reducing potential for overdose in Illinois.

AUGUST 31, 2023 INTERNATIONAL OVERDOSE AWARENESS DAY ILLINOIS

Improving Healthcare and Reducing Overdoses

In 2021, an estimated 3,013 fatalities were due to opioid overdose in Illinois. Please join the **Illinois Department of Human Services Division of Prevention and Recovery (SUPR)** for a virtual event to highlight overdose prevention practices. Presenters include **Representative La Shawn K. Ford**, **Dr. Sarah Pointer**, Pharm D., Clinical Director of the Prescription Monitoring Program, Bureau of Pharmacy & Clinical Support Services, **Richard Weisskopf**, State Opiate Treatment Authority, **Dr. Nicole Gastala**, SUPR Medical Director, **Kathleen Monahan**, SUPR Statewide Opioid Response Administrator, **Ron Vlasaty**, CEO of Family Guidance Center, and **Ashur Shiba**, Overdose Prevention Advocate.

1 Hour Virtual Event

Start Time: 10:00 am

Public Act 103-0477

WHAT IS IT?

Governor Pritzker signed SB 285, Public Act 103 - 0477 into law, which clarifies requirements on what data fields need to be reported and the removal of outdated methods.

To clarify ...

Date prescription filled relates to the ASAP format DSP05 Date Filled (Required), this is the date that the prescription was prepared for the patient by the pharmacist. This is often called dispensing as the prescription is prepared and set aside for the patient.

Date dispensed relates to the ASAP format DSP17 Date Sold (Situational). This field is used to determine when a prescription left the pharmacy, not the date that it was prepared by the pharmacist. Use of this requires bi-directional communication between the pharmacy dispensing system and the point-of-sale system. The sale of the prescription would have to be reported back to the pharmacy dispensing system for reconciliation. This reporting function is not available in most pharmacy systems.

THE DISPENSER MUST ELECTRONICALLY TRANSMIT THE FOLLOWING PRESCRIPTION DATA:

1. The recipient's name and address.
2. The recipient's date of birth and gender.
3. The national drug code number of the controlled substance dispensed.
4. The quantity of the controlled substance dispensed and days supply.
5. The dispenser's United States Drug Enforcement Administration registration number.
6. The prescriber's United States Drug Enforcement Administration registration number.
7. The dates the controlled substance prescription is filled.
8. The payment type used to purchase the controlled substance (i.e. Medicaid, cash, third party insurance).
9. The patient location code (i.e. home, nursing home, outpatient, etc.) for the controlled substances other than those filled at a retail pharmacy.

Removes the date the controlled substance is dispensed.

Removes outdated submission methods such as:

(A) an electronic device compatible with the receiving device of the central repository;

(B) a computer diskette;

(C) a magnetic tape; or

(D) a pharmacy universal claim form or Pharmacy Inventory Control form.

WHY IS IT BENEFICIAL?

Removing "Date(s) Dispensed" field is cost effective for all. This is not a data field available within the American Society of Automation in Pharmacy's national standards.

ILPMP Upcoming Conference Schedule

September

Illinois Council of Health - System Pharmacist

ICHP Annual Meeting
September 21 - 22
Drury Lane Theatre & Events, 100 Drury Lane
Oakbrook Terrace, IL

Illinois Pharmacists Association

IPhA Annual Conference
September 29 - Oct 1
Crowne Plaza Hotel, 3000 South Dirksen Parkway
Springfield, IL

October

Illinois Society for Advanced Practice Nursing

ISAPN Midwest Conference
October 4 - 7
DoubleTree by Hilton, 3003 Corporate West Dr.
Lisle, IL

University of Illinois Chicago College of Pharmacy to Offer Free Opioid Analgesic REMS CE

FREE Continuing Education Programs for Healthcare Providers, provided through UIC – Illinois ADVANCE
15-20 minute Academic Detailing Virtual Visits (Each program approved for 0.5 contact hours. CME, CNE, CPE)

- Meets DEA requirements for opioid education
- Fully compliant with the Opioid Analgesic Risk Evaluation and Mitigation Strategy (REMS) education requirement issued by the FDA.

[More Information](#)

Opioid Analgesic FREE REMS CE

Academic detailers from UIC share up-to-date information on pharmacotherapy and treatment guidelines through interactive discussions on opioid safety.

- Connect with clinical pharmacists**
 - 15 to 20 minute virtual visits
 - 1:1 focused education
 - Convenient, flexible scheduling
- Get the latest information**
 - CDC Guideline Overview
 - Saving Lives with Naloxone
 - Pain in Special Populations
- Discuss evidence-based resources**
 - Tools targeted for real-world prescribing decisions
 - Relevant, practical pharmacotherapy insights
- Earn free CE credit**
 - 1:1 educational visits qualify for CME/CNE/CPE
 - Meets DEA requirements for Opioid Analgesic REMS education

To learn more about our program visit <https://academicdetail.pharmacy.uic.edu/>

Educational Resources

NEW Webinar: Continuing Medical Education

Benefits of a Designee

[Webinar](#)

- Describe the ILPMP program and registration process
- Explain how a prescriber can assign a designee
- Identify the capabilities and responsibilities of a prescriber and designee within the ILPMP
- Discuss the importance and benefits of assigning designee(s)
- 1.0 contact hour CME

The ILPMP collects and tracks controlled substances and other drugs of interest, including:

- Naltrexone
- Naloxone
- Butalbital/Acetaminophen/Caffeine
- Muscle Relaxants
- Gabapentin

See the Data Submitter's Guide for a full list.

Start submitting today!

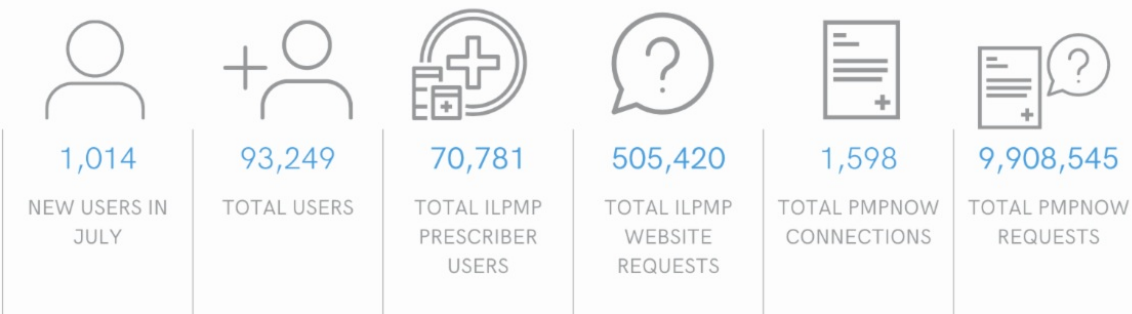

Step 1: Register to become a Data Submitter @ <https://rxsubmit-il.logicoy.com/>

Step 2: Download the Illinois Data Submitter's Guide

For Naloxone submission, the ILPMP requires NPI, and DEA number if applicable.

If you have questions about the information that appears in this update or suggestions for future content, please email dhs.pmp@illinois.gov. Visit www.ilpmp.org for more information.

The Illinois Prescription Monitoring Program (ILPMP) is an electronic database that collects, tracks, and stores reported dispensing data on Schedule II-V controlled substances, selected drugs of interest, and other health information. The Illinois Department of Human Services oversees the ILPMP, authorized by the Illinois Controlled Substances Act (720 ILCS 570/316). The ILPMP adheres to HIPAA and all access, disclosure, and confidentiality provisions of Illinois Law.
